PRIMARY EXAMINER

The following is an examiner's statement of reasons for allowance: While it is known in the art to irradiate an inspection sample with a higher-energy electron beam and a lower-energy electron beam simultaneously in order to neutralize charge build-up on insulating materials in the sample, the prior art does not teach to use yet another electron beam to perform the inspection after the charge has been neutralized.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
